Artist
Ricardo Morcillo, 2022.

Inspirada en las obras escultóricas de arte óptico y cinético de mediados del siglo XX, **KINETIC LIGHT SCULPTURES** rinde homenaje al trabajo del escultor constructivista Naum Gabo y a todos aquellos artistas pioneros que abrieron nuevos caminos en la era posvanguardista.

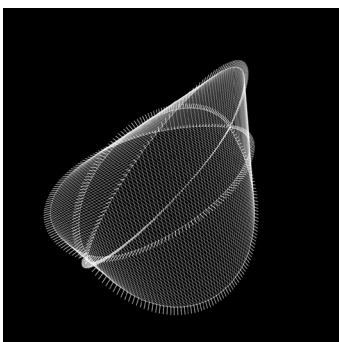

Hoy, las herramientas de software de diseño digital y el lenguaje de código comienzan a abrir nuevas vías de exploración artística. La obra investiga y reformula aquellas expresiones escultóricas artísticas pasadas, todavía contemporáneas.

Cada pieza -creada a partir de la deformación de un mismo volumen de malla esférica de líneas, vectores y nodos- parte de una posición geométrica reconocible que rota y/o se multiplica hasta encontrar su propia identidad óptica y formal. El movimiento cíclico e hipnótico de las esculturas cinéticas nos atrapa e invita a reflexionar sobre nuestra percepción de un mundo en el que nada es lo que parece.

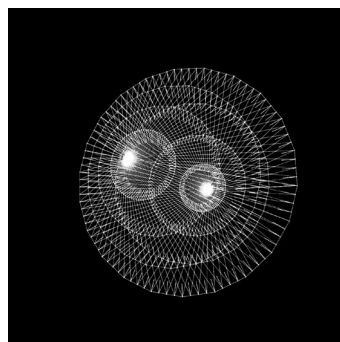

*Inspired by the sculptural works of optical and kinetic art of the mid-20th century, **KINETIC LIGHT SCULPTURES** pays homage to the work of constructivist sculptor Naum Gabo and all those pioneering artists who broke new ground in the post-avant-garde era.*

Today, digital design software tools and code language are beginning to open new avenues of artistic exploration. The work investigates and reformulates those past artistic sculptural expressions that are still contemporary.

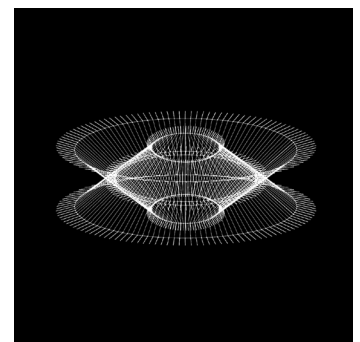

Each piece - created from the deformation of the same spherical mesh volume of lines, vectors and nodes - starts from a recognisable geometric position that begins to rotate and/or multiply until it finds its own optical and formal identity. The cyclical and hypnotic movement of the kinetic sculptures traps us and invites us to reflect on our perception of a world in which nothing is what it seems.
